

EB-L1715S

DATASHEET

Versatile 15,000-lumen 3LCD laser projector, offering outstanding fit and forget reliability as well as sharp, vivid imagery with SXGA+ resolution.

Exceptionally bright 15,000-lumen SXGA+ performance combines with rich, vivid colours to make the EB-L1715S installation laser projector an ideal option for large rooms and venues. As well as reliable fit and forget performance, it offers very flexible installation, creating a dedicated solution for scenarios where only maximum performance and durability will do.

Laser-sharp images

Ensure that your presentations, images and video pack a punch with the vivid, sharp projection offered by this 3LCD laser projector. Designed for larger venues, its high resolution SXGA+ images are vivid and bright, even in daylight, while inorganic phosphor wheel technology provides superior light and heat resistance to deliver excellent reliability that lasts for up to 83,000 hours¹.

Flexible positioning

Thanks to a wide range of motorised lenses, including optional ultra-short-throw (UST) lens, the projector benefits from true 360° installation flexibility, allowing it to be placed virtually anywhere - without loss of brightness or distortion of image. The projector also has a built-in camera to ensure accurate calibration and capture diagnostic images (this can be fully disabled to prevent remote access).

Versatile new software

All models in the EB-L1000 series can take advantage of free Epson Professional Projector Tool software from December 2017. It allows you to set up multi-projector installations straight out of the box, simply and quickly, as well as utilising advanced techniques such as projection-mapping and edge-blending.

Quick set-up

Get started quickly thanks to a lens memory function which stores projector settings such as image position, focus and zoom, for prompt access when projecting images in different aspect ratios, or using different lenses.
